Journal of the London Mathematical Society

VOLUME 91 PART 3 JUNE 2015

J. Lamplugh: An analogue of the Washington–Sinnott theorem for elliptic curves with complex multiplication I 609–642
Martin Bright: Bad reduction of the Brauer–Manin obstruction 643–666
Michael Wiemeler: Torus manifolds and non-negative curvature 667–692
Joel Fine and Dmitri Panov: Circle-invariant fat bundles and symplectic Fano 6-manifolds 709–730
Yihong Du and Lei Wei: Boundary behavior of positive solutions to nonlinear elliptic equations with Hardy potential 731–749
Giovanni Felder and Thomas Willwacher: Jointly orthogonal polynomials 750–768
Natalia Castellana and Alberto Gavira-Romero: Cellular approximations of infinite loop spaces 769–785
V. Solanki: Equivariant Zariski structures 786–804
